

Pioneering for You

Wilo efficient solutions for water supply - 50Hz

Wilo-MHiKE/PBI-L

Home booster system

**“Perfectly
coordinating
performance
and efficiency,**

**that’s what I call
Pioneering for You.”**

Dr. Franka Schneider, Research Engineer Fluid Mechanics
WILO SE

Our goal is your efficiency

Your expert for building services.

We optimise our products for you

With more than 140 years of experience and the know-how of one of the world's leading pump manufacturers, we are your ideal partner for high-efficiency heating, cooling, air-conditioning, water supply and sewage disposal for commercial properties. Because we know what we are doing, and we understand your concerns as a planner. Our goal therefore is to make your daily work as easy, pleasant and successful as possible.

For this reason, we develop and optimise our pumps and systems in direct communication with all those involved, i.e., with planners, installers and operators. The result are products that are not only highly efficient and future-proof but also easy to install and operate. In addition to our extensive range of products, we also offer numerous services and solutions to make your planning even more productive. This is what we mean by Pioneering for You.

1 Ever more economical

Our pumps become ever more economical. Our developments meet high efficiency standards all over the world. This saves energy and gives you security for the future.

2 Ever more intelligent

With intelligent control software, our pumps become ever better at meeting the changing requirements during operation. This increases the flexibility and efficiency of use for your customers.

3 Ever quieter

Our pumps become ever quieter, because we analyse their operating noises in an acoustic laboratory using cutting-edge methods and take targeted action to minimise these noises for your customers.

4 Ever more durable

We examine our pumps in advance in extensive computer simulations and laboratory and field tests to ensure high quality and reliability right from the start. The result are products that ensure high operational reliability over the long term.

Wilo-MHiKE/PBI-L

Home booster system – Excellent Energy Saving

1 Inverter control multi system

Able to set various operation mode

2 Anti rust

All STS & Plastic material

3 Various pump protection function

Dry running protection, Max pressure setting function

4 Reflect environment condition for user

Friction loss compensation, Minimum frequency setting function

Control and protection function

Function	MHiKE/PBI-L	MHiKE-D/PBI-LD	MHiKE-W/T
Operation at fixed pressure set	0	0	0
Unusual excessive pressurizing protection	0	0	0
Automatic restart after fault	0	0	0
Automatic restart after blackout	0	0	0
Dry running protection	0	0	0
Auto/manual operation	0	0	0
Over/under voltage protection	0	0	0
Warm-up operation mode	-	0	0
Alternative operation mode	-	0	0
Automatic back up (when in trouble)	-	0	0
Friction loss compensation	-	0	0
Max pressure setting function	-	-	0
Max/minimum frequency setting, sequential operation	-	-	0

Specification

Model	Power(kW)	Power source	Inverter output(kW)	Operation pressure (kgf/cm ²)	Rated Capacity	Pipe dia(mm)		Max.fluid Temperature (°C)
						Suc.	Dis.

MHiKE-W804GA	2.5X2		3.0	3	300ℓ/min	65	65	
MHiKE-W805GA	3.0X2		4.0	4	280ℓ/min	65	65	
MHiKE-T406GA	2.2X3		2.2	4	280ℓ/min	65	65	
MHiKE-T804GA	2.5X3		3.0	3	450ℓ/min	80	80	
MHiKE-T805GA	3.0X3		4.0	4	450ℓ/min	80	80	

* Rated capacity is based on operation pressure.

* The suction head of PBI-L303/304/603EA (self priming model) is 6m.

* '/' at the inverter output distinguishes between the inverter output of MHiKE and PBI-L in the order named. ex) MHiKE-203A: 0.75 kW, PBI-L203EA : 1.1 kW

Model selection table

MHiKE / PBI-L Series

High efficiency pump (Excellent pressure control in real time)

MHiKE Series

PBI-L Series

MHiKE / PBI-L Series

- Excellent energy saving (max 80% of saving energy with VFD)
- Various pump protection functions (excellent protection functions always work)
- Handy installation and easy maintenance (by re-starting automatically when the cause of error is solved)
- Excellent design and light weight (low noise & vibration)

Application

- Water supply and Pressure boosting
- Residential areas, motels, holiday houses, etc
- Small sprinkler, water management facility which requires a fixed pressure
- Fire extinguisher pump, industrial circulating system
- Boiler water supply, coolant system, etc

Performance curve

MHiKE-D / PBI-LD Series

High efficiency pump (Low noise & Energy saving)

MHiKE-D Series

PBI-LD Series

MHiKE-D / PBI-LD Series

- Pump load distribution (ensure the excellent product lifetime by sharing pump load equally in the automatic operation by turns)
- Dry running protection (prevent the pump from operating without water by constant detection function)
- Operation by skipping the faulty pump
(although one of pumps is failed to operate, the other pump continuously operate so that it prevents from the sudden water supply interrupt)
- Warm-up function
(if the pump is not used for a quite some time, it operates periodically at the minimum speed so that it enables the pump to keep optimal and smooth operating as well as to detect whether the pump has a problem)

Application

- Water supply and Pressure boosting
(Big capacity, high-rise/low water pressure areas)
- Residential areas, motels, holiday houses, etc

MHiKE-W/T Series

Inverter booster system (Stability of water supply)

MHiKE-W/T Series

MHiKE-W/T Series

- Pump load distribution (ensure the excellent product lifetime by sharing pump load equally in the automatic operation by turns)
- Friction loss compensation function
(considering low flow friction losses, automatically changes partial pressure low flow to prevent unnecessary pressure losses for energy-saving)
- Inverter alternating cycle
(if one inverter drives over the setting time, the other pump will automatically switched to drive, this can prevent overload of a particular pump)
- Operation by skipping the faulty pump
(although one of pumps is failed to operate, the other pump continuously operate so that it prevents from the sudden water supply interrupt)

Application

- Water supply and Pressure boosting
- Small building, officetel, etc
- Construction work (instead of booster)
